Profile

Computer Science student and aspiring UI/UX Designer with a strong portfolio of mobile and web projects across banking, healthcare, education, parking, and digital identity. Skilled in Figma, wireframing, prototyping, and accessibility-focused design. My software development background helps me create user-friendly designs that are also practical to build.

Design Skills

- **Design & Prototyping Tools:** Figma (design, prototyping, auto-layout, components, variants)
- **Core UX Skills:** User research, information architecture, wireframing, user flows, interaction design, usability heuristics
- **Visual & UI Design:** Visual hierarchy, typography, design systems, responsive layouts for web and mobile
- **Accessibility:** Inclusive design, high-contrast interfaces, font scaling, voice control, simplified-language UX
- **Complementary Technical Skills:** HTML, CSS, JavaScript (basic), Java, Python, Git – enables closer collaboration with developers
- **Languages:** Nepali (native), English (fluent)

UI/UX Projects

Park Finder – Map-Based Parking App

Designed a map-based parking discovery experience covering real-time availability, parking comparisons, and detailed listing information, with a strong emphasis on visual hierarchy and intuitive navigation.
Figma Design | Prototype

Accessa Bank – Accessibility-First Banking Concept

Designed key financial journeys – account management, transfers, wallet loading, and bill payments – for an accessibility-first banking concept, prioritizing clarity, simplicity, and inclusive usability.
Figma Design | Prototype

EduLinkX – Student Learning Platform

Designed a student-focused learning platform built around subject-based learning, lesson content, tuition resources, and student communication, with an emphasis on simple navigation and a clean, engaging experience.
Figma Design | Prototype

CareEase – Accessibility-First Healthcare App

Designed a healthcare app focused on simple navigation, clear information, and emergency access, incorporating accessibility features such as adjustable font sizing, high contrast, voice control, and simplified language.
Figma Design | Prototype

PrivID – Privacy-Focused Digital Identity Wallet

Designed a digital identity wallet experience centered on user-controlled identity sharing, credential verification, QR-based proof sharing, and document scanning, with a strong focus on privacy, security, and simplicity.

Figma Design | Prototype

Education

- **B.Sc. in Computer Science**, Taylors University, 2023 – 2027
- **+2 Science**, Devi Secondary School
- **Class 10**, Rudra Memorial Secondary School

Experience & Activities

- Managed an event with a team; role: Marketing and Promotions – coordinated messaging and visual promotion materials
- Self-directed UI/UX portfolio development – independently researched, designed, and prototyped full-scale web and mobile app concepts across banking, healthcare, education, mapping, and identity domains
